

DHANJI BHAGAT

MERN STACK DEVELOPER

Phone: (+91) 9408016672 | **Email:** [dhanji2bhagat@gmail.com](mailto:ghanji2bhagat@gmail.com) | **LinkedIn:** [dhanji-bhagat](https://www.linkedin.com/in/dhanji-bhagat)

Skilled MERN stack developer with 2+ years of hands-on experience in building full-stack web applications, focusing on creating responsive user interfaces and efficient RESTful APIs. Proficient in MongoDB, Express.js, React.js, and Node.js, with strong expertise in both front-end and back-end development. Dedicated to continuous learning and mastery of modern web technologies.

KEY SKILLS

Front End:

- HTML5, CSS3, Bootstrap5
- JavaScript/ES6, jQuery, Typescript
- ReactJS, NextJS, JSX, Redux

Databases:

- MySQL, MongoDB

Back End:

- Node.js, Express.js, PHP (CodeIgniter)

Devops:

- GitLab, Github

WORK HISTORY

Jr. Software Developer

01/2022 - Present

Hyperlink Infosystem

Ahmedabad, Gujarat

- Developed robust and scalable full-stack applications using the MERN stack, implementing efficient and secure API endpoints to support data flow between the client and server.
- Collaborated with cross-functional teams to gather requirements, design solutions, and implement features, resulting in timely delivery of projects.
- Created responsive and user-friendly interfaces with React.js and designed intuitive admin panels, enhancing the user experience across web applications..
- Implemented RESTful APIs and integrated third-party services to extend the functionality of web applications, increasing overall system capabilities.
- Designed and implemented databases for web applications using MySQL and MonogDB, ensuring data integrity, performance, and scalability throughout the project lifecycle.
- Conduct regular check-ins and meetings with clients to understand their needs and provide tailored solutions.

PROJECT

- **Tour and Travel Website:** Integrated APIs and developed the website by incorporating HTML pages within the PHP CodeIgniter framework with multilingual support.

- **Fantasy Game App:** Created RESTful APIs with MySQL and admin panel for game and player management systems, socket.io for auction for team and player, including real-time cricket score updates using socket.io for both admin panels and mobile applications.
- **Society Management:** Designed and implemented a society management system in the PHP CodeIgniter framework, integrating APIs and responsive web design for seamless interactions.
- **Job Management System:** Created RESTful APIs and developed an admin panel with PHP CodeIgniter framework, incorporating a readymade theme to enhance the user experience.
- **Artist Ecommerce:** Created RESTful APIs for managing product catalogs, orders, and checkout functionality, including cart management for a smooth shopping experience.
- **Health Management:** Developed a web panel in PHP CodeIgniter framework for health experts to manage user exercise and diet plans, featuring theme-based design for user-friendly navigation.
- **Course Learning Platform:** Managing a course management website with React, allowing users to manage subscriptions, track progress, and earn points as they complete courses.
- **Property Finder:** Developed a website using NextJS by incorporating HTML pages with Google Maps integration and also creating a properties panel in ReactJS.
- **Job Apply System:** Developed an API and user panel for a job management system where users can post job openings and apply for them. Upon application, an email notification is automatically sent to the HR team.
 - **Tech Stack:** Node.js, Express.js, TypeScript (ESM), MongoDB, Vite

EDUCATION

- Bachelor of Engineering in Information Technology, 2019 - 2022.
- Diploma of Engineering in Information Technology, 2016 - 2019.
